SOLUTION SNAPSHOT

LONG DISTANCE HEARING	CLEAR SOUND (NO NOISE)	SECURITY & GUARDING
NATURE & BIRD RECORDING	EMERGENCY & RESCUE	LIVE LISTENING

Built for Real Operations

Listen to any distant sound clearly with the finest Parabolic Microphone Bangladesh, built to catch sharp audio even from huge distances. Get professional grade sound focus that makes outdoor security, wildlife recording, and tough rescue operations smoother than ever.

CAPABILITIES

Key Features & Product Modules

High-Acoustic Reflector Dish

Collects and concentrates distant sound waves perfectly into the microphone. Made of advanced, crystal clear polymer that catches faint sounds without any distortion.

Smart Sound Amplifier Circuit

Boosts low audio signals instantly so you can hear them loudly and clearly. Equipped with an advanced noise-filter chip that delivers pure, crisp human speech.

Pro Grade Noise Isolating Headphones

Delivers the captured sound directly to your ears while blocking outside stadium or wind noise. Features soft, modern ear cushions and high-fidelity drivers for 100% reliable, real-time audio monitoring.

Military Grade Weatherproof Shell

Protects the inner sensitive microphones and circuits from heavy dust and sudden rain splashes. Super durable yet lightweight casing, making it highly reliable for tough outdoor missions.

Ultra Sensitive Sound Core (Microphone)

Captures extremely quiet whispers or specific sounds from a huge distance. Uses highly modern sound-isolation tech to pick only your target voice and ignore surrounding noise.

Heavy Duty Ergonomic Grip

Allows the user to hold, target, and operate the device comfortably for hours. Built with an industrial-grade, slip-proof frame that ensures zero hand vibration during operations.

Accurate Optical Targeting Scope

Helps you visually aim and lock onto the exact person or object you want to listen to. High clarity glass focus ensures you never miss your target, even in crowded or low-light situations.

Long Life Smart Power Cell

Supplies continuous, stable power to the internal amplifier for all day field use. Uses modern energy saving technology that guarantees the system won't drop performance during critical hours.

Where This Product Fits

Sports Broadcasting & Media Journalism.

Flood Disaster Management, Rescue Missions, and Emergency Operations.

Intelligence Gathering, VIP Security, and Law Enforcement.

Wildlife Research, Forest Observation, and Nature Recording.

OPERATIONAL VALUE

Software, Benefits & Outcomes

Real Time Audio Control

This section lets you monitor, listen, and control distant sounds live from your screen.

- Listen to high quality audio feeds instantly without any delay.
- Increase or decrease target sound levels with a single click.
- Focus and lock onto a specific voice in a crowded area.

Automated Secure Storage

This feature safely saves your audio files and helps you find them easily later.

- Auto saves audio clips with exact time, date, and location tags.
- Find any specific recording instantly using simple keywords.
- Keeps your confidential data locked and 100% safe from hackers.

AI Speech Analytics

This smart portion automatically cleans the recorded audio and extracts important words.

- Instantly removes wind, traffic, and stadium noise.
- Automatically identifies and highlights human speech.
- Converts recorded Bengali or English speech into readable text files.

Case Studies & Client Feedback

06

"We connected it to our existing 200-camera network in a weekend. Intrusion detection accuracy was above 97% with fewer false alarms than our previous system."

Head of Security Technology
National Critical Infrastructure Operator

RESOURCES

Media & Questions

07

Q. How far can this parabolic microphone capture sound?

A. The range depends on the environment and conditions. In open areas with low background noise, it can capture audio clearly from a significant distance. It works best in quiet, open outdoor settings.

Q. Is it suitable for security and surveillance use?

A. Yes. It is widely used for security monitoring and audio intelligence gathering. It allows professionals to listen to distant sounds without entering the target area.

Q. Can it be used for wildlife recording?

A. Yes. This device is ideal for wildlife observation. The long-range and noise reduction system lets you record natural animal sounds without getting close enough to disturb them.

Q. Does it come with a recording option?

A. The standard unit delivers real-time audio through headphones. An optional recording module is available as an accessory if you want to save audio for review or evidence purposes.
